MORE BUSINESS MEN

WHAT IS NEEDED FOR INTELLI-GENT TARIFF REVISION.

Emphatically the Work of Congress, but Must Be Done by Those Thoroughly Conversant with the Nation's Needs.

The National Chamber of Commerce made a pronouncement on the subject of the tariff. A business body natur ally concerned itself with a business topic. What is called a tariff commission-a tribunal to report to congress -was favored, and the constituent bodies of the national body are asked for expressions on the subject.

It is to be hoped, however, that the matter may be canvassed more clearly this time than several years ago, when at a national convention of American manufacturers held at Indianapolis it was proposed that tariff-making be taken out of the hands of congress and given into those of a commission of experts. Congress, it was solemnly declared, lacked the knowledge essential to schedule-making and rate-fixing, and should surrender that function to a tribunal of business men in every way competent to deal with it.

Evidently the authors of that deliv erance lacked knowledge themselves They did not know that congress could not if it would, and would not if it could, divert itself of the taxing power, which is the greatest power it exercises. The power of taxation is the power of life and death in the business world, and for that reason was invested by the constitution in congress, the body chosen by the people to act for all the people, producers and consumers.

For better or for worse, therefore, tariff-making is with congress, and must remain with congress. If more and better light is necessary to an improved execution of the task by that body, let it be provided. But the power to act, either with light or in darkness, will still be with congress.

And so a better remedy than a tariff. commission might be more business men in congress. Let more men of business light and leading be invested with power, not to gather statistics, and compile them and comment on them in a report to congress, but to legislate on statistics. Information sufficient to construct a tariff bill is abundant, and may be easily gathered The point always is, and always will be, as to its value in the eyes of those charged with the duty of passing on

The Underwood tariff revision now on the stocks will be appraisable when for him we strapped him to a horse it takes the water, not on the score and rode with him 100 miles to Pueblo of whether the builders had timber enough, but what selection was made of the timber at hand. If this ship sinks it will be for something of the same reason that carried the Gorman-Wilson ship to the bottom nearly twenty years ago-a job botched in an effort to hide or excuse the use of protection after that material had been condemned as unfit for shipbuilding.

Mr. Burleson Starts Well.

Postmaster General Burleson has started the management of his department with the proper measurement of merit and politics, which was promised for the whole Wilson admin-Istration.

His first appointment was of Merritt O. Chance, a Republican, to be chief clerk of the postoffice department.

Mr. Burleson did not permit politics to overshadow Mr. Chance's merit, Mr. Burleson recognized in Mr. Chance a man who, by native ability and industry, and by twenty-five years of useful and varied experience in the postoffice department and in the president's commission on efficiency and economy, is qualified to serve a Demo cratic or a Republican administration with equally effective competence.

High Tariff "Democrats."

"It can be confidently predicted that the representatives of the Louisiana sugar industry, as well as the senators and representatives of this state, will do all in their power to prevent free sugar, and to limit the reduction in the tariff, if such becomes inevithat the nebulae in the pleiades were table, to the smallest possible proporilluminated by the reflected light of tions.

Thus the New Orleans Picayune, which also denounces proposals to cut down the tariff on lumber and on rice. Yet the Picayune calls itself a Democratic newspaper.

Selfishness of this sort wrecked Democracy once before, when Arthur The supposition has always been Pue Gorman turned the tariff bill into that the nebulae were self-lighting; a sham and overwhelmed the Democratic party with "perfidy and disflery substance. The discovery would honor."-Chicago Journal.

Must Take Plain Stand.

Papers and congressmen wishing to maintain the exactions of the present tariff should come out in the open. They should support Taft, Aldrich, Dalzell, Cannon and Payne. They should ally themselves with the Republican old guard.-Chicago Journal.

Hunt for Diplomats. President Wilson seems to be planning to appeal the question of pay in our diplomatic service to the court of public opinion. The proposition he virtually puts up to the people of the United States is this: The men who ought to be in the important foreign posts haven't the private means to stand the expense and the government does not stand it for them. There are men than can stand the expense, but,

"Protection" Anomaly,

ought not to be in the posts.

Crude rubber and scrap rubber was imported duty free to the amount of \$99,000,000. It was bought by the rub ber trust. Manufactured rubber-the only kind consumers use is "protected" by duties of 35 to 40 per cent.

Old Pie Shops Disappearing. With the decline of the a la mode beef shop in London one notes also the disappearance of most of the oldfashioned pie shops, such as the famous cel-pic shop in Ficet street that the youthful fancy of the writer always associated with the story of Sweeney Todd, "the demon barber." The itinerant vender of sheep's trotters has also almost disappeared, as well as the seller of sandwiches at the doors of theaters, while the peripatetic pie has quite vanished from the streets. In their place we have the
